PROFESSIONAL SUMMARY

Frontend Engineer with 4 years of experience building scalable and high-performance web applications using **React**, **Next.js**, and **TypeScript**. Strong focus on creating responsive, user-centric interfaces and delivering smooth, reliable user experiences. Experienced in developing real-time and data-driven applications, integrating **REST/GraphQL APIs** and **real-time systems** in high-concurrency environments. Possess solid system understanding, enabling effective collaboration with backend teams and ensuring performance, consistency, and maintainability across the application.

CORE COMPETENCIES

- Frontend:** ReactJS • NextJS • Vite • TypeScript • TailwindCSS • Three.js • Redux/Zustand • Framer Motion/GSAP • SEO
- Backend:** NodeJS • ExpressJS • REST/GraphQL API • Python (FAST API) • C# (ASP .NET) • PostgreSQL • MongoDB • Redis
- Architecture & System Design:** Security-first Thinking • Pixel-perfect Implementation • Mono Components Architecture • Mobile-first approach • Responsive Web Design • Distributed System Concepts • Event-driven Architecture • Caching Strategies
- Performance & Testing:** Playwright • Unit Testing • End-to-End Testing principles • Debugging
- Tools & Workflow:** Git • GitHub • CI/CD (basic) • Email CMS • n8n • AI Tools (ChatGPT, Claude)

PROFESSIONAL EXPERIENCES

Orochi Network

06/2024 - Now

Software Engineer

Developing production-grade Web3 applications and zero-knowledge platforms, integrating blockchain systems with high-performance frontend interfaces.

- Built real-time website systems using WebSocket, event-driven architecture, and blockchain event listeners reducing API polling by **~90%**.
- Implemented transaction state synchronization for workflows serving **315,000+ concurrent users**, ensuring accurate UI reflection under load
- Designed modular frontend architecture and reusable component systems, reducing feature development time and improving consistency across multiple products.
- Integrated blockchain data and smart contract interactions, processing **886M+ real-time events** with reliable synchronization between on-chain and UI website state
- Optimized rendering performance and error handling, achieving **0.0025% error rate** across **274K+ monthly** operations in production
- Implemented client-side proof verification using o1js for real-time validation and display of results.

AH-Groups QT-DATA VN

08/2023 - 04/2024

Technology Development

- Migrated desktop tools to **Python Flask** WebApps and design UI/UX.
- Develop BackEnd autobot to handle automation systems like auto crawl data services
- Built automation scheduled email sending, email read-tracking via pixel tracker.
- Deploy webapp by using Docker.

PERSONAL PROJECTS

Ngoo Coffee

08/2025 - 02/2026

FullStack Developer

- Built a **responsive and high-performance UI using Next.js and TypeScript**, focusing on smooth interactions, clean design, and scalable component architecture
 - Implemented **real-time order tracking with WebSocket**, improving UI responsiveness and reducing polling by **~90%**
 - Designed and managed **complex client-side state** for payment and order flows, ensuring accurate UI updates under concurrent interactions
 - Integrated **REST/GraphQL APIs and Web3 wallet flows**, handling asynchronous data and transaction states (pending/confirmed/failed) seamlessly
 - Optimized frontend performance using **lazy loading, caching, and efficient data fetching**, reducing API load by **~60%**
 - Developed reusable UI components and structured codebase for **maintainability and faster feature iteration**
-
- Live Demo: <https://ngoo-cf.vercel.app/>
 - Backend Repository: <https://github.com/ThanhNguyen03/ngoo-server-2025>
 - Frontend Repository: <https://github.com/ThanhNguyen03/ngoo-cf-2025>
 - Contract Repository: <https://github.com/ThanhNguyen03/ngoo-contract>

EDUCATION

10/2021 - 03/2025

Software Engineer

UEH University of Economics Ho Chi Minh City

- GPA: 3.44/4.00
- Relevant Coursework: Data Structures & Algorithms • Database Systems • Software Architecture • Distributed Systems • Web Development

ADDITIONAL INFORMATION

- **Languages:** English (communication level)
- **Methodologies:** Experienced in Agile/Scrum with sprint planning, code reviews, and cross-functional collaboration
- **Community:** Participated in DEVCON and DEVCITY 2024 (Bangkok, ChiangMai)—connecting with global developers and staying current with industry trends
