PROFESSIONAL SUMMARY

Software Engineer with 4 years of experience building high-performance, scalable backend systems and responsive, user-centric interfaces web applications, with a strong focus on API design, distributed systems, real-time architectures and smooth interactions UI.

Strong advocate of clean code and maintainable architecture, with a system-oriented mindset and a bias toward shipping practical, scalable solutions. Comfortable working in fast-paced environments, quickly adapting to new technologies, and collaborating effectively across cross-functional teams.

CORE COMPETENCIES

- Backend:** NodeJS • ExpressJS • REST/GraphQL API • Python (FAST API) • C# (ASP .NET)
- Frontend:** ReactJS • NextJS • Vite • TypeScript • TailwindCSS • Three.js • Redux/Zustand • SEO basics
- Databases:** PostgreSQL • MongoDB • Redis
- Architecture & System Design:** Security-first Thinking • Distributed System Concepts • Event-driven Architecture • Caching Strategies • Retry Mechanisms • Circuit Breaker • Rate limit • Race conditions
- Performance & Testing:** Playwright • Unit Testing • End-to-End Testing principles • Debugging
- Tools & Workflow:** Git • GitHub • CI/CD (basic) • Agile/Scrum • AI Tools (ChatGPT, Claude)

PROFESSIONAL EXPERIENCES

Orochi Network

06/2024 - Now

Software Engineer

Developing production-grade Web3 applications and zero-knowledge platforms, integrating blockchain systems with high-performance frontend interfaces.

- Built real-time systems using WebSocket and event-driven architecture, reducing API polling by **~90%** and improving responsiveness for high-frequency updates.
- Implemented transaction state synchronization for workflows serving **315,000+ concurrent users**, ensuring accurate UI reflection under load
- Designed modular frontend architecture and reusable component systems, reducing feature development time and improving consistency across multiple products
- Integrated blockchain data and smart contract interactions, processing **886M+ real-time events** with reliable synchronization between on-chain and application state
- Optimized rendering performance and error handling, achieving **0.0025% error rate** across **274K+ monthly** operations in production
- Implemented client-side proof verification using o1js for real-time validation and display of results

AH-Groups QT-DATA VN

08/2023 - 04/2024

Technology Development

- Develop BackEnd autobot to handle automation systems like auto crawl data services
- Migrated desktop tools to **Python Flask** WebApps and design UI/UX.
- Built automation scheduled email sending, email read-tracking via pixel tracker.
- Deploy webapp by using Docker.

PERSONAL PROJECTS

Ngoo Coffee

08/2025 - 02/2026

FullStack Developer

- Designed a **fullstack architecture using Node.js and Next.js**, applying modular service-based structure (controller/service/repository) to improve maintainability and scalability
 - Built an **idempotent payment system using Redis locks**, preventing duplicate transactions and ensuring data consistency in webhook-based workflows
 - Implemented **real-time order tracking with WebSocket**, reducing API polling by **~90%** and improving user experience
 - Applied **caching and optimized data fetching strategies**, reducing API load by **~60%** under concurrent usage
 - Integrated **EVM wallet payments and PayPal**, ensuring consistency between off-chain and on-chain data flows
 - Designed **secure authentication and rate limiting mechanisms**, improving system reliability and preventing API abuse
- Live Demo: <https://ngoo-cf.vercel.app/>
 - Backend Repository: <https://github.com/ThanhNguyen03/ngoo-server-2025>
 - Frontend Repository: <https://github.com/ThanhNguyen03/ngoo-cf-2025>
 - Contract Repository: <https://github.com/ThanhNguyen03/ngoo-contract>

EDUCATION

10/2021 - 03/2025

Software Engineer

UEH University of Economics Ho Chi Minh City

- GPA: 3.44/4.00
- Relevant Coursework: Data Structures & Algorithms • Database Systems • Software Architecture • Distributed Systems • Web Development

ADDITIONAL INFORMATION

- **Languages:** English (communication level)
- **Methodologies:** Experienced in Agile/Scrum with sprint planning, code reviews, and cross-functional collaboration
- **Community:** Participated in DEVCON and DEVCITY 2024 (Bangkok, ChiangMai)—connecting with global developers and staying current with industry trends
