

PROFESSIONAL SUMMARY

Software Engineer with 4 years of experience building scalable backend systems and high-performance web applications. Strong in fullstack development with a focus on **frontend architecture, real-time UI, and distributed systems using React, Next.js, Node.js, and TypeScript**. Experienced in building responsive, user-centric interfaces while ensuring performance, data consistency, and seamless integration with backend services. Proven ability to deliver production-ready features with strong ownership in fast-paced environments.

CORE COMPETENCIES

- **Frontend:** ReactJS • NextJS • Vite • TypeScript • TailwindCSS • Three.js • Redux/Zustand • SEO basics
- **Backend:** NodeJS • ExpressJS • REST/GraphQL API • Python (FAST API) • C# (ASP .NET)
- **Databases:** PostgreSQL • MongoDB • Redis
- **Architecture & System Design:** Security-first Thinking • Distributed System Concepts • Event-driven Architecture • Caching Strategies • UI Architecture • State Management • Responsive Design • Performance Optimization
- **Performance & Testing:** Playwright • Unit Testing • End-to-End Testing principles • Debugging
- **Tools & Workflow:** Git • GitHub • CI/CD (basic) • Agile/Scrum • AI Tools (ChatGPT, Claude)

PROFESSIONAL EXPERIENCES

Orochi Network

06/2024 - Now

Software Engineer

- Developing production-grade Web3 applications and zero-knowledge platforms, integrating blockchain systems with high-performance frontend interfaces.
- Built **real-time UI systems using WebSocket and event-driven architecture**, reducing polling by ~90% and improving user experience
 - Implemented **transaction state synchronization (pending/confirmed/failed)** for workflows supporting **315K+ concurrent users**
 - Designed **scalable frontend architecture and reusable component systems**, improving consistency and development speed
 - Integrated **blockchain data and smart contract interactions**, processing **886M+ real-time events** with reliable UI synchronization
 - Optimized UI rendering and performance, achieving **0.0025% error rate** across 274K+ monthly operations
 - Implemented **client-side proof verification (o1js)** and handled complex async UI states.

AH-Groups QT-DATA VN

08/2023 - 04/2024

Technology Development

- Develop BackEnd autobot to handle automation systems like auto crawl data services
- Migrated desktop tools to **Python Flask** WebApps and design UI/UX.
- Built automation scheduled email sending, email read-tracking via pixel tracker.
- Deploy webapp by using Docker.

PERSONAL PROJECTS

Ngoo Coffee

08/2025 - 02/2026

FullStack Developer

- Built a responsive and **high-performance UI** using **Next.js** and **TypeScript**, focusing on smooth interactions, clean design, and scalable component architecture
- Designed a **fullstack architecture using Node.js and Next.js**, applying modular service-based structure (controller/service/repository) to improve maintainability and scalability
- Built an **idempotent payment system using Redis locks**, preventing duplicate transactions and ensuring data consistency in webhook-based workflows
- Implemented **real-time order tracking with WebSocket**, reducing API polling by **~90%** and improving user experience
- Developed reusable UI components and structured codebase for maintainability and faster feature iteration
- Applied **caching and optimized data fetching strategies**, reducing API load by **~60%** under concurrent usage
- Integrated **EVM wallet payments and PayPal**, ensuring consistency between off-chain and on-chain data flows
- Designed **secure authentication and rate limiting mechanisms**, improving system reliability and preventing API abuse
- Live Demo: <https://ngoo-cf.vercel.app/>
- Backend Repository: <https://github.com/ThanhNguyen03/ngoo-server-2025>
- Frontend Repository: <https://github.com/ThanhNguyen03/ngoo-cf-2025>
- Contract Repository: <https://github.com/ThanhNguyen03/ngoo-contract>

EDUCATION

10/2021 - 03/2025

Software Engineer

UEH University of Economics Ho Chi Minh City

- GPA: 3.44/4.00
- Relevant Coursework: Data Structures & Algorithms • Database Systems • Software Architecture • Distributed Systems • Web Development

ADDITIONAL INFORMATION

- **Languages:** English (communication level)
- **Methodologies:** Experienced in Agile/Scrum with sprint planning, code reviews, and cross-functional collaboration
- **Community:** Participated in DEVCON and DEVCITY 2024 (Bangkok, ChiangMai)—connecting with global developers and staying current with industry trends
