PROFESSIONAL SUMMARY

Software Engineer with 4 years of experience building high-performance, scalable backend systems and responsive, user-centric interfaces web applications, with a strong focus on API design, distributed systems, real-time architectures and smooth interactions UI.

And with 3+ years of experience in **Web3** industry with building high-performance **Web3** applications using **React**, **Next.js**, and **TypeScript**. Strong focus on **EVM wallet** integration, **transaction lifecycle** handling, and real-time **on-chain state synchronization**, delivering responsive and reliable user experiences in high-concurrency environments.

Comfortable working in fast-paced environments, quickly adapting to new technologies, and collaborating effectively across cross-functional teams.

CORE COMPETENCIES

- Frontend:** ReactJS • NextJS • Vite • TypeScript • TailwindCSS • Three.js • Redux/Zustand • Wagmi/Viem • SEO
- Backend:** NodeJS • ExpressJS • REST/GraphQL API • Solidity • Hardhat • EtherJS • PostgreSQL • MongoDB • Redis
- Architecture & System Design:** Security-first Thinking • Pixel-perfect Implementation • Mono Components Architecture • Mobile-first approach • Responsive Web Design • Distributed System Concepts • Event-driven Architecture • Caching Strategies
- Performance & Testing:** Playwright • Unit Testing • End-to-End Testing principles • Debugging
- Tools & Workflow:** Git • GitHub • CI/CD (basic) • Email CMS • n8n • AI Tools (ChatGPT, Claude)

PROFESSIONAL EXPERIENCES

Orochi Network

06/2024 - Now

Software Engineer

- Built production-grade **Web3** interfaces integrating **EVM wallets** (MetaMask, Wagmi/Viem), supporting 315,000+ concurrent users with seamless authentication and onboarding flows
- Implemented transaction lifecycle handling with real-time UI updates using WebSocket and blockchain event listeners, processing **886M+ on-chain** events with high reliability
- Designed event-driven frontend architecture, reducing **~90% API polling** and improving responsiveness for high-frequency transaction updates
- Developed reusable component systems and dynamic **ABI-driven** UI generation, improving scalability and reducing development time across multiple products
- Ensured consistency between on-chain and UI state, handling asynchronous transaction flows while maintaining **0.0025% error rate** across **274K+ monthly operations**
- Optimized frontend performance and error handling for complex UI interactions under high concurrency, delivering stable production user experience

AH-Groups QT-DATA VN

08/2023 - 04/2024

Technology Development

- Develop BackEnd autobot to handle automation systems like auto crawl data services
- Migrated desktop tools to **Python Flask** WebApps and design UI/UX.
- Built automation scheduled email sending, email read-tracking via pixel tracker.
- Deploy webapp by using Docker.

PERSONAL PROJECTS

Ngoo Coffee

08/2025 - 02/2026

FullStack Developer

- Built **Web3-enabled frontend with Next.js**, integrating EVM wallet flows (Wagmi/Viem) for transaction signing and authentication
- Implemented **smart-contract interaction** (Solidity + Hardhat deployment) and handled transaction lifecycle (sign → submit → confirm)
- Developed **real-time UI synchronization using WebSocket and on-chain event listeners**, reducing polling by ~90%
- Designed **hybrid payment system** (PayPal + EVM wallet), ensuring consistency between off-chain and on-chain data
- Applied caching and optimized data fetching, **reducing API load by ~60%** while maintaining responsive UX

- Live Demo: <https://ngoo-cf.vercel.app/>
- Backend Repository: <https://github.com/ThanhNguyen03/ngoo-server-2025>
- Frontend Repository: <https://github.com/ThanhNguyen03/ngoo-cf-2025>
- Contract Repository: <https://github.com/ThanhNguyen03/ngoo-contract>

EDUCATION

10/2021 - 03/2025

Software Engineer

UEH University of Economics Ho Chi Minh City

- GPA: 3.44/4.00
- Relevant Coursework:

Data Structures & Algorithms • Database Systems • Software Architecture • Distributed Systems • Web Development

ADDITIONAL INFORMATION

- **Languages:** English (communication level)
- **Methodologies:** Experienced in Agile/Scrum with sprint planning, code reviews, and cross-functional collaboration
- **Community:** Participated in DEVCON and DEVCITY 2024 (Bangkok, ChiangMai)—connecting with global developers and staying current with industry trends
